May 2021
EAA CHAPTER 377

EAA—Our mission: To grow participation in aviation by sharing the spirit of aviation.

LAST MONTH

From Bill Cotter

The fly-in in Elkhart in April was well attended. We had about 22 planes. The day of the fly-in was beautiful and couldn't have been any better. Thank you to Dennis Tevebaugh for the delicious hamburgers and many member brought in many tasty desserts.

You can see by the photos that everyone enjoyed themselves. We had a business meeting to discuss the next fly-in. A lot of fun was had by everyone who attended. One of the members said these fly-in are fun and well worth coming.

THIS MONTH

Airshow 36K

EST. 2016
LAKIN

May 29, 2021

Dual Performance by
Brian Correll
Bob Richards

FREE ADMISSION

Sponsored by:
The Kearny County Chamber of Commerce

Car Show - Vendors - Fun Run

Hot Air Balloon Rides

Lakin Alumni Association Banquet

Golf Scramble
Loucks Park Municipal Golf Course

Free Airplane Rides for Kids, May 28 Sponsored by: EAA Young Eagles

SPONSORS

REMEMBER---if you plan to FLY in to 36K, **CHECK NOTAMS!** The airport will be **CLOSED** during the airshow. For the VERY LATEST information, call Flight Service at **800-WX Brief (800-992-7433)**

F.Y.I.

Chapter 377 normally meets on the second Saturday of each month. "Meetings" are normally fly-ins to different member airports, with a potluck at noon and short meeting following. December is the Club Christmas Party. Contact any of the officers listed to confirm meeting date and place. Anyone interested in recreational flying or building is encouraged to attend.

FLY PAPER is published monthly, normally mailed a week before each meeting/fly-in.

Annual membership in Chapter 377 includes one year subscription to FLY PAPER. Send \$15 (\$7.50 after July 1) to Randal Loder, Treasurer,

Readers are encouraged to contribute articles, photos, etc. by submitting them to the Editor/Publisher.

Deadline for the June 2021 issue is June 21.

OFFICERS:

President—Bill Cotter, 936-499-8042, wmpcotter@aol.com

Vice President—Matt Rome, 620-544-6331
matthewrome33@gmail.com

Newsletter Editor / Publisher—Mary Shortridge

maryshortridge@gmail.com
12401 Yankee Hill Rd, Bennet, NE 68317

Tech Counselor—Bill Anton, 620-649-2797 or (c)649-7172, bnanton@pld.com

Treasurer/Secretary—Randal Loder, rloder@ssbscott.com
Work Phone: 620-872-7224 Ext. 231, Mobile: 620-214-3877
508 S College St, Scott City, KS 67871

With the state of Covid19 stuff, who knows what will happen on a day to day basis. President Bill Cotter has organized this list for 2021; please confirm times/locations as some changes may occur. Sure hope to see you on the ramp some day soon!

COMING UP...

May 28 & 29—Lakin, KS Air Fair.

Friday Young Eagles 1-6pm, Saturday All Day Car Show. Jeff Morgan, 620-355-9302. **PLEASE NOTE THIS IS NOT OUR "NORMAL 2ND SATURDAY."**

12 June—EAA 377 Noon Potluck, Scott City (TQK). Randal Loder will have lots of local help for a BBQ potluck at noon. Please bring a dessert to share, if you wish. We will be eating at SFEC.

10 July—EAA 377 Noon Potluck hosted by Marshall Watson Family at Sublette, KS 19S. 620-353-0349

Monday, July 26-Sunday, August 1—AirVenture

14 August—EAA 377 BREAKFAST at Hooker, OK. 9am. Hosted by Hooker Airport and Mark Davis. 620-482-0354

11 September—Air Show in commemoration of 20th anniversary of 9/11. Scott City, KS Airport.

18 September—EAA 377 Noon Potluck, hosted by Mid America Air Museum, Liberal, KS KLBL. 620-624-5263 **PLEASE NOTE THIS IS NOT OUR "NORMAL 2ND SATURDAY."**

2 October—Syracuse/Hamilton CO (3K3) Annual Classic Fly-In. Steve Phillips 620-384-5835 (Remember Syracuse is on Mountain Time) **PLEASE NOTE THIS IS NOT OUR "NORMAL 2ND SATURDAY."**

6 November—EAA 377 Noon Potluck, hosted by Stan Reiss

family. Plains, KS. 620-629-3604 **PLEASE NOTE THIS IS NOT OUR "NORMAL 2ND SATURDAY."**

11 December—Christmas Party.

ANOTHER ISSUE

THANKS TO: Ben McNary, Bill Anton, Bill Cotter, Bob Immel, EAA, Liz Vulgamore, Paul Fiebich, Randal Loder, Rick Dearden, Tom Auerbach, Tom Winter. **THANK YOU ALL FOR YOUR SUPPORT!**

You don't have to be an instrument pilot to benefit from the IMC Club meetings at SFEC. Meeting is 7-8pm CT, with dinner offered at 6:45. Come join in on the discussion on the second Monday of each month (not meeting in June). For More Information you can contact

Elizabeth Vulgamore,
Volunteer administrator
620-874-8325

Spencer Flight & Education Center

Ponca City Airport is still closed due to runway re-construction – only helicopters may land at the airport. The closure notice currently ends May 31, 2021; however, it will be extended. **Current estimate for completion in mid- June or later.** Enrique's Mexican Restaurant will continue in operation with regular hours of operation.

The Ponca City monthly fly-in breakfast is cancelled until further notice. No estimate is available as to when it can resume.

FAA Check NOTAMS:

APRIL AT ELKHART

EAA 377 MEMBERSHIP

Our treasurer, **RANDAL LODER**, has expressed concerns regarding the slow renewals this year. I am sure it is due, in part, to Covid and poor weather for those that pay "in person". Also, we are not printing FLY PAPER any more, so renewal envelopes only went out once, not multiple times as we have done in the past.

At last count, we have 62 members on our roster. And four of those are new! We had 90 members in 2020, and my records show 33 2019 members did not renew in 2020 (I think some have paid for 2021, however).

I know our group is a vibrant, healthy chapter. BUT---this is a trend we do not want to see. We have hovered around 100 members for the past few years.

So far this year, Randal has written the following checks:
~\$423.00 to EAA national for our annual dues and fees,
~\$12.00 for postage
~\$95.25 to the Scott Co Treasurer for 2020 and 2021 trailer tags.

Our expenses are pretty low, as much of the events are paid for by the member(s) hosting. PLEASE keep our checkbook healthy, and mail Randal your dues, if you haven't yet. THANK YOU!!!!

Mail your check for \$15 to Treasurer/Secretary

Randal Loder
508 S College St

Mobile: 620-214-3877

FROM PAUL FIEBICH—I just finished the Annual Condition Inspection on my AirBike. She is ready to fly again and I will enjoy using the navigation tablet mounted to my kneeboard. It is a real anxiety reducer on out of the area flights.

HEARD IN THE HANGAR

FROM BEN McNARY—“Four planes from Scott City made a weekend overnight flyout trip to Gaston’s Resort at the bottom of Bull Shoals Reservoir. There is a beautiful grass runway with cabins to rent along the river. We had a great time fishing, flying and enjoying their wonderful restaurant. We hope to do another group trip next year!”

The 100-Dollar Haircut, Chapter Two

By Tom Winter, Lincoln, NE

I've decided that needing a haircut is just another excuse to get out and fly! And that's what I call it, the 100-dollar haircut. Better for the waist-line than the burger!

The old white hair was Long. (See before picture!)

The ol' white mop was considerably overgrown from staying home and covidianly avoiding dense people. Now, someone like Kermit Weeks can get away with a ponytail, but he's not married to Joanna, so it really was time. My recent haircuts had meant a flight to Scribner, where I unfold the folding bike, and bike the four miles on County Road J to Hooper, where Don's Barber Shop is smack in the center of the town's historic block, and where \$10 gets you looking like a soldierboy. And it's right next to a very nice restaurant.

But it was time to explore, so I decided to fly to Fremont for a two-fer: (1) Check if the construction has started on the new terminal building, and (2) get a haircut. (Here's an "Executive Summary:" (1) I got the haircut. (2) They've prepared the ground for the construction of the terminal.)

Wind being from the south, I had to start the wrong way, but I was happy with how quickly Departure turned me loose. Wind at FET was about 45° off 14-34, and gusty, so the landing was an exercise in concentration.

I was glad to notice that foundation work has started, and got a picture right out the windshield but got a better one later, on climbout. And the haircut? Nobody in the terminal building could guide me to a Fremont barber shop! Somebody said "Stylemasters," to which I snorted "I'm not going to no beauty parlor!" Finally Deb turned to the yellow pages. "It goes from 'bank' to 'basement'" she said. No luck there, but she dug out a visitor's guide and found me a barbershop, downtown on 6th street.

Pulled out the folding bike, flipped it open, aired up the tires (sitting in the plane for weeks between rides always means the tires soften) and hit the road. Stopped many a time along the way to admire and even photograph some of Fremont's old

houses. Fremont is in the wide Platte Valley, and, it is all level, unlike Lincoln which is one darn hill after another, so the pedaling was easy and relaxing. A pleasant, two-mile bike ride later, there I was, in front of an actual barber shop, Kiel's.

Inside the shop two women are each busy cutting hair. One stops to ask "What can we do for you?" I pull my locks sideways on both sides: "Take one look at me, and then take one guess."

How much is a haircut?" \$20. "Okay, I've got a 20 in my pocket." I asked Colleen (say CO leen) take before-and-after pictures with my camera, and she did before-and-after pictures with her cell phone, too. "No idea I was such a handsome dude" I said when she had finished. Only fly in the ointment: she shaved the neck with a straight razor. The back of my neck had never been shaved before and now the bare and shaven skin itches. Another time, I'll just ask to taper the hair at the neck.

It was a pleasant bike ride back, with the wind picking up. Took my time to enjoy the ride. Back at FET, I folded the bike, stuffed it, and launched. On climbout, I got a good view of the new construction, and grabbed the camera and one-handed the camera through the pilot-side window. The picture turned out! Bumpy flight all the way to 4,500. Wind at LNK was 16G22, but at 16, i.e., right down the runway. Very nice landing.

Of course, in a few weeks I will need another haircut. I'm already planning on trying Central City, where they also have a century-old Opera House!

TABLET KNEEBOARD

By Paul Fiebich

Long multi-stop cross-country flights always include a certain level of anxiety. I always prepared with advance planning by collecting airport information, weather forecasts, fuel availability, and sectionals. I also filed flight plans because I never had ground support following me.

Twenty-two years ago, I navigated all my cross-country flights used only pilotage. I even made the 800 mile return trip from Oshkosh that way. Pilotage is a tried & true method that works well while dramatically increases one's self-confidence. But the anxiety is high because missing a landmark could mean you get lost. Eventually, I acquired a Magellan 300 GPS hand-held unit meant for ground-dwelling hikers, boaters, and bikers. Fortunately, as anticipated, I found it worked well at several thousand feet above the ground too. It was a wonderful anxiety reducer.

Most recently I acquired an Alcatel tablet and downloaded free navigation software called Avare. This brings me into the 22nd century! (I don't really try to keep up with technology; I just try to avoid falling further behind!) The software is phenomenally inclusive and with the aid of numerous Avare tutorials on You Tube, I have been able to learn those functions appropriate for my flying.

Unfortunately, there was no place on my AirBike where I could mount the tablet to make it convenient to use and where it wasn't a visual obstruction. Being a woodworker, I solved the problem in my shop. I made a kneeboard out of scrap material that would hold the 5" X 7" tablet.

One quarter inch thick plywood served as the main part, thin strips of hardwood formed the border which trapped the tablet. Cutouts in the border pieces permitted access to the side mounted controls and charging port.

A piece of soft wire formed over my thigh served as the pattern for making a cutout in the kneeboard's angled plywood "leg" that would rest there. The angled wood support improved the sight angle making the tablet easier to read. A piece of five eighths diameter Backer Rod with a groove cut in it then glued to the curved "leg" area provided cushioning.

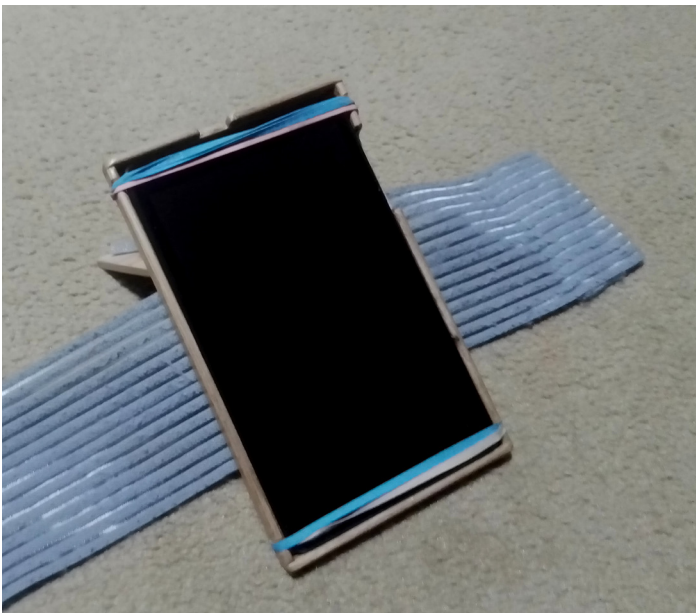

To keep the kneeboard in place, an elastic band purchased at Walgreens Drug Store was threaded through the kneeboard and wrapped around my leg. Its Velcro end secured the elastic band in place. A couple of rubber bands keep the tablet attached to the kneeboard yet allowed for easy removal.

This entire set-up works very well; it is comfortable, convenient to read, and easy to operate. Best of all, on the two flights tested so far, it has reduced my anxiety level to zero! The features of the Avare software can totally eliminate all the paper sheets and index card support information I used to carry. Once confident enough with this electronic aspect of navigating, I will only carry a chart, compass and handheld GPS as backup.

A couple hours in the shop and you too can make a similar kneeboard to accommodate your tablet and the downloaded Avare software. Make the kneeboard to suit your tablet and leg size.

Kneeboard base and angled leg are made from 1/4" plywood, sides are made from thin hardboard. Note cutouts to access tablet controls and slots for elastic band.

Alcatel tablet on carpet---Tablet nests securely in kneeboard and held in place with rubber bands. Elastic band holds kneeboard to operator's knee.

Kneeboard cushionin---Backer Rod (dowel-shaped insulation) has been slotted and glued to the knee cutout to cushion the leg fit.

Kneeboard is conveniently located and easy to use while in flight.

The Magellen 300 GPS has now been replaced by the tablet.

Completed flight path---The 5" x 7" tablet display is very readable, it can also be zoomed.

Mid-America Air Museum's Featured Plane of the Month "The Pietenpol Air Camper"

By Bob Immell, Director

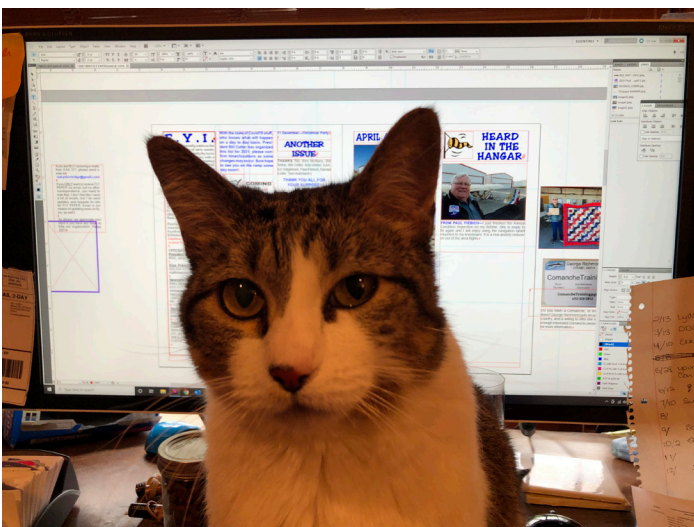

This month's featured aircraft is the Pietenpol Air Camper which is one of the oldest (possibly the oldest) kit planes that you could purchase and build yourself, although originally all you were purchasing was the plans to the plane. More on that in a moment. Bernard Pietenpol from Cherry Grove, Minnesota was a man who after much experimentation designed the plane in 1929. Being a practical man who didn't want to make an expensive plane he put to good use his knowledge as an auto mechanic and modified a Model A Ford engine that produced 40 horsepower to propel his new plane. After all Model A engines were plentiful and inexpensive compared to the other options. Shortly thereafter the publisher of Modern Mechanics which was being published in Minneapolis wrote a story which basically said automotive engines were not suitable for use in an airplane. Apparently, Bernard took exception to this article and contacted the publisher who in turn wanted Bernard to fly his plane to Minneapolis to prove it. Bernard did just that and Modern Mechanics published a relatively long article about the plane that Bernard wrote.

Bernard now had a problem. People wanted to buy the plane which was almost entirely of wood construction covered in fabric with only a few metal parts such as engine mounts, and with Model A engines so readily available they wanted to build the planes themselves. Bernard's problem was that he didn't have any plans for the design of the plane so he hired his neighbor's 17-year-old son who was studying drafting to draw the plans and well as they say the rest is history. Over the years the wooden parasol wing plane was built and modified by its builders to use a variety of engine types including the Chevrolet Corvair flat head 6-cylinder engine, and later the Continental A65, C85, and C90 air cooled engines. Some builders even covered their planes with a metal skin instead of fabric.

The museum's plane was built by N. H. Kensinger of Joshua, TX and first taxied on April 15, 1963. It is equipped with a 1939 Ford Model A engine and a wooden propeller. Mr. Kensinger was a licensed aircraft mechanic who made a few modifications that allowed it to conform to the original design but was able to slow the rpms from 2300 to 1900. The plane was later sold to Col. Tom Thomas and is now proudly a part of our museum's collection. Generally speaking the Pietenpol Air Camper has an empty weight of 610 lbs. with a gross weight of 995 lbs. Its max speed is around 100 mph and a stall speed reportedly of 35 mph. As always if you wish to see the plane in person come visit us at the Mid-America Air Museum in Liberal, KS.

FROM BILL ANTON—We hauled the RV-4 to Crott's this morning, May 6. It's the same process I used with both the RV-8 & the Bearhawk. The final finishing touches, ie, paint, engine installation, fiberglass, fairings etc will be done there. I'll fly or drive up every day to work with them. The combination of making the airplane safe & beautiful is worth the extra expense.

KITT SHORTRIDGE is an EAA volunteer, helping with the monthly newsletter FLY PAPER in a supervisory position.

Last week in Scott City; not exactly good flying weather, but the farmers are pleased to see measureable moisture! Photo courtesy **RICK DEARDEN**.

This airplane has superpowers; incredibly short take-offs/landings at the Omaha, NE Henry Doorly Zoo.

WEBINAR

Tips for Flying Into EAA AirVenture 2021

Wed, Jun 23, 2021
7 - 8:30 p.m. CDT

Presenter: Fred Stadler

The 2021 AirVenture NOTAM includes significant changes to the VFR arrival procedures. EAA's volunteer NOTAM Chairman, Fred Stadler, describes those changes and also shares some tips for reducing pilot workload when flying into AirVenture. Qualifies for FAA WINGS credit.

DUNCAN AVIATION

UPCOMING EVENTS

TOM AUERBACH of Ponca City, OK does a GREAT job of keeping a list compiled of upcoming aviation events. Looking for an excuse to fly? Here you go! Remember to verify as part of your preflight! Covid issues as well as weather issues can cause last minute changes.

Saturday, May 22, 2021

Haskell OK: Coffee & Donuts

Haskell Airport (2K9) AirNav.com CTAF: 122.9
EVERY SATURDAY - 8:00 am - 10:00 am

May 22 - Garnett, KS - Garnett Industrial airport (K68) 8 AM-1 PM. 8th Annual Air Fair in conjunction with the Downtown Square Fair Arts and Crafts Expo We are having a fly-in, food vendors, airplane rides, static displays of aircraft (hopefully some military), face painting and jeep rides for the kids. We will have transportation available for transport to the arts and crafts fair and also to the local VFW for breakfast as another option. Contact: Pat Schettler (785) 448-8067. Email airport@garnettks.net or simplygarnett.com

May 22 - Mountain View, AR - Mountain View Airport (7M2) will be hosting a fly-in breakfast to open the summer flying season. The usual fare, including eggs, sausage, bacon, and pancakes will be served. All by donation - if you're broke from filling up that King Air, you are still welcome to breakfast! We will have our next breakfast on June 12, 2021, during the Ercoupe Fly-In. Come on in, eat hearty, and admire some twin tailed beauties! Contact Larry at 501-203-8644.

May 22 - Midway, AR - Baxter County Airport (KBPK) "The American Warbird Fly-In" This event will take place from 10AM - 4PM. This event is sponsored by the EAA Chapter 775. We have several Warbird's that are planning to be in attendance. We will have several booths and food vendors. It is going to be a great time. Avgas will be discounted the day of the event. Static Displays and booth setup time is between 8AM - 10AM. All aircraft that wish to be on display please contact Trey Ressler at trey@flybigair.com Rain Date for the event is May 29th.
