August 2023
EAA CHAPTER 377

EAA—Our mission: To grow participation in aviation by sharing the spirit of aviation.

LAST MONTH

SUBLETTE, KS BY BILL COTTER

A BIG THANK YOU to the **MARSHALL WATSON** family for hosting our July Fly-In. We are fortunate that the Watson family regularly hosts our group every July at the Sublette, KS airport.

EAA 377
BREAKFAST FLY-IN
SATURDAY, AUGUST 12
@9:30AM
HOOKER, OK 045

THIS MONTH

FROM MARK DAVIS

The 5th annual Hooker Fly-In will be Saturday, August 12th at 9:30 am at the Hooker Municipal Airport, O45.

Airplanes from all around the area and members of the local EAA Chapter 377 will be in attendance. Everyone is encouraged to come out to watch the planes come in, visit with the pilots, look at the aircraft, and enjoy the morning. If you are interested in aviation, and are looking to have questions answered, this is a perfect event to attend.

The Taco Stop will provide a delicious breakfast with breakfast burritos or breakfast plates including eggs, bacon or sausage, potatoes, and bread along with juice and coffee available. All EAA members and pilots will receive a coupon for free breakfast.

There will be a spot landing contest upon arrival with a \$75 gift card for the winner. In addition, there is a \$100 award for the pilot who flies in from the furthest distance and a \$100 random drawing for a lucky pilot who flies in.

For more information contact
Mark Davis at 620-482-0354 or
Aaron Witt at 580-522-1231

F.Y.I.

Chapter 377 normally meets on the second Saturday of each month. "Meetings" are normally fly-ins to different member airports, with a potluck at noon and short meeting following. December is the Club Christmas Party. Contact any of the officers listed to confirm meeting date and place. Anyone interested in recreational flying or building is encouraged to attend.

FLY PAPER is published monthly, normally mailed a week before each meeting/fly-in.

Annual membership in Chapter 377 includes one year subscription to FLY PAPER. Send \$20 to Randal Loder, Treasurer,

Readers are encouraged to contribute articles, photos, etc. by submitting them to the Editor/Publisher.

Deadline for the August 2023 issue is August 4, 2023

OFFICERS:

President—Bill Cotter, 936-499-8042, wmpcotter@aol.com

Vice President—Bill Anton, 620-649-2797 or (c)649-7172, bnanton@pld.com

Newsletter Editor / Publisher—Mary Shortridge 620-272-4379 (receives text messages, photos) maryshortridge@gmail.com 12401 Yankee Hill Rd, Benet, NE 68317

Tech Counselor—Bill Anton, 620-649-2797 or (c)649-7172, bnanton@pld.com

508 S College St, Scott City, KS 67871

COMING UP in 2023...

12 August— EAA 377 Breakfast Fly-In, hosted by City of Hooker, Mark Davis. Hooker, OK. 620-482-0354 *Please note this is BREAKFAST to beat the summer heat.

August 19-20th— The Garmin KC Air Show

August 26-27—Guardians of Freedom Airshow at Lincoln, NE Airport | 9:30am-5pm. Free admission.

9 September— Air Show and Young Eagles event at Scott City, KS Airport. See poster.

16 September— EAA 377 Noon Potluck, hosted by MidAmerica Air Museum. Liberal, KS. 620-624-5263 ***Please note this is the THIRD Saturday.**

23 September—Run, Drive, Fly to Lakin

7 October—Annual Classic Fly-In. Syracuse, KS. 620-384-5835 *Please note this is the FIRST Saturday.

4 November— EAA 377 Noon Potluck, hosted by Stan Reiss Family, Southwest Family Farms. Plains, KS. 620-629-3604 *Please note this is the FIRST Saturday.

9 December— EAA 377 Christmas Party, hosted by Randal Loder. SFEC Scott City, KS. 620-214-3877

You don't have to be an instrument pilot to benefit from the IMC Club meetings at SFEC. Meeting is 7-8pm CT, with dinner offered at 6:45. Come join in on the discussion on the second Monday of each month (not meeting in June). For More Information you can contact

Photos from the August 2022 through March 2023 Breakfasts are posted under "Media / Albums".

Also: Effective April 1, 2023 hours extended 7:00AM to 10:30AM and requested donation \$10 adults / \$5 kids under 12.

See attached breakfast flyer.

CAN YOU HELP???

FROM RANDAL LODER JULY 13TH—"July 8, 2023 I received a bill from BS Trailer Sales for \$1,808.38. I asked for and received the attached invoice for the details..

The situation is that after today's deposit we have a checking balance of \$1,656.58. Logan Aviation requested the \$100.00 support for the June Fly-In in Lakin leaving us at least (\$251.80) shy of being able to cover this invoice from B&S. I don't know if there are any other bills coming from B&S or others, but I am projecting that 2 additional Fly-In sponsors will request the \$100.00 support payment before the December Christmas party. (Membership renewals for 2024 will begin)

Are there any suggestions on how to proceed? My first thought is that we send a notice out to the membership requesting additional donations to cover the expenses of the new trailer and indicate that we need a minimum of an additional \$750 to restore a reasonable balance to EAA Chapter 377's account.

If you would like to contribute some monies towards this cause, or would like more information, please send your donation to

Randall Loder

HEARD IN THE HANGAR

FROM KYMBERLY LOGAN—Mommy's little helper (Daughter Elaine) got a wonderful surprise from Mary Shortridge this month! Elaine's new shirt makes her 100% official at the airport! She's always excited to be at the shop and to help, until she needs a nap. So on Independence Day, mommy set up her cot and a favorite show, "Super Wings" (airplanes that deliver packages to kids and help in a crisis). It was warm day, but the fan made it comfortable! And after a nap, she's ready to go some more!

FROM TOM AUERBACH—I guess you could say I got my crankshaft problem solved. I ended up buying another crankshaft from a friend in Valley Center KS and he delivered it to the overhaul shop in Collinsville OK.

Engine has been re-assembled but has not yet been test run.

I expect to pick it next week

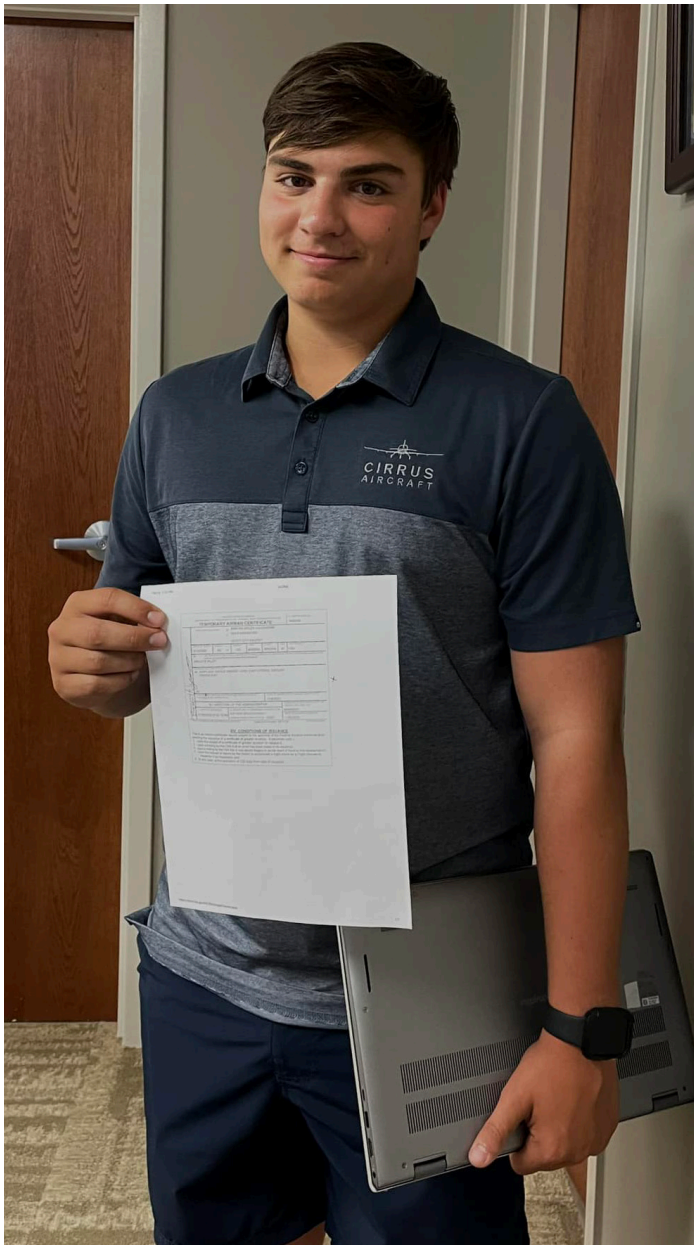

HEARD IN THE HANGAR

FROM TODD CRIST—Having some clipped wing cub fun at the Annual July 4 Pancake feed at Yoder Field. Switching out the fun with some Stearman flying with Amber Crist at KGCK.

HEARD IN THE HANGAR

LIZ VULGAMORE—Congratulations to **BREVEN VULGAMORE** on earning his Private Pilot Certificate!

JERRY KOEHN is busy building the tail cone for his Rans S21 Outbound!

Find us on
facebook
-or-
www.eaa377.org

SHIOW FALLS, SD AIRSHOW

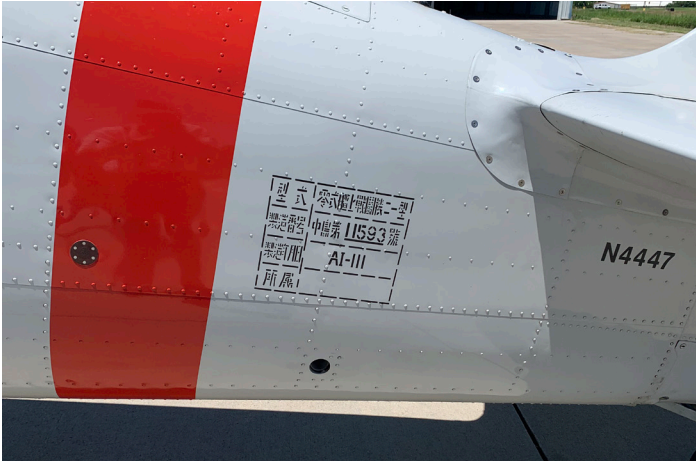

CHRIS STOKES of Lincoln, NE enjoyed the Sioux Falls Airshow from the perfect perch—on top of his Stearman!

ELKHART, KS

As **BILL COTTER** was preparing to leave for the Sublette fly-in last month, Elkhart Airport Manager **DENNIS TEVEBAUGH** let him know that there was some fun activity happening at the airport. The AT6 painted to represent Japanese WWII warbirds for the movie "Tora, Tora, Tora!". The flight of five were from Florida on their way to Seattle for a reunion.

Mid-America Air Museum

By Bob Immell, Director

MUSEUM UPDATE

Hello Everyone,

What a busy summer it has been here at the Mid-America Air Museum. Before I get into this month's featured airplane let me give you a little update on some of the activities that have occurred this year. Our spring months were the busiest I have seen here during my 4 and 1/2 years as Director when it comes to school tours. Besides the relatively close schools we see pretty much every year we had a number of schools that were either here for the first time, or had not been in a really long time. The number of private schools visiting the museum increased as well with many of the schools who came this year riding an average of two or more hours each way. This summer we have had a number of tours with some YMCA groups and Vacation Bible School groups from other cities traveling to our museum. We are looking forward to more tours as schools start up again this month. Summer vacationers have also kept our staff busy as many families both near and far have traveled through the museum. Although I do not conduct all of the tours myself as often as I can I give family tours and I am happy to say that many young teenagers that were here with their families were surprised to find out that learning history can be fun and many said they were inspired to learn more about history and aviation as well. Many families that came this year were hoping to learn more about what other family members flew in both WWII and the Vietnam Wars, and most left the museum having seen and learned more than they had hoped for. I am extremely proud of that fact. We have had many visitors from other aviation museums from across the country and all of them I met were very complimentary about the museum. Of course, they were impressed with the collection, but many of them were surprised at how clean the aircraft inside are and wondered how we accomplish that. This is where I have to say "thank you" to my staff and some wonderful kids who have been dusting airplanes for us. We have also met visitors from NASA, Lockheed, Textron, an F-14 Tomcat Group from the northeastern part of the United States, and many more aviation related companies.

Some of the special projects that we have been working on include upgrading our story boards, and two new exhibits which we are very proud of. If you haven't been to the museum in the last couple

of months you will find a wonderful newly refurbished NASA exhibit, and a new exhibit which we will continue to expand on for Dr. Harold Reid who was a B-17 Ball Turret gunner in the early days of the 8th Airforce's bombing missions into Europe. We also have been trying to acquire Bob Hoover's North American Sabreliner that he performed some airshows in. Thank you, Kimberly Logan, for the referral and help on that project. Whether we will ultimately acquire this amazing plane or not we will have to wait and see. It has turned out to be a real challenge to find a qualified crew to travel to Tulsa, OK to disassemble the plane for transport. We have tried many places and so far, we have not had much luck in that area although one company has expressed an interest in the project and are working on an estimate of the expense associated with the task. Keep your fingers crossed as it would be an amazing addition to the museum.

Now for the featured plane for this month. Ta Da it is the Beech Starship. This will be at least a two-part series possibly a third part in the October edition of Flypaper. As Halloween approaches there are some coincidences and some stories about the museum from the past and this plane that I find interesting enough that I might write a special about, but that is all I will say about it for now. As you are aware we have a Beech Starship in our collection and only 53 of them were ever made. I have been told that there are either three, five, or seven still flying. I know for sure at least three flies with two of those based in Aspen, CO and one in Texas. I have been told there is one in the Middle East, and one in South America, but I can't confirm those planes. I do know the man in Aspen has more airframes and a large collection of spare parts so maybe he either has or will put a few more back in the air. Our Starship was donated to the museum by Beech Aircraft. Over the last few years I have met some of the people who actually worked on building the plane in our museum, some of the engineers who worked on the design, some mechanics who worked on our plane when Beech owned it, a man who was shocked while doing the electrical wiring, and an FAA man who was a part of the team that evaluated whether the Starship was safe or not. I have also met people who actually flew in our plane, and the truck drivers who delivered it. Our plane is the sixth Starship built. I will put the specifications for the plane in the next article for September's Flypaper. For now, let's talk a little bit about the history of the plane. As I understand it in the early days of private jets Olive Ann Beech made a decision that Beech should not make jets as they weren't suitable for a lady to be able to get in and out of in a dignified manner so Beech would focus on twin turbo-props. Maybe that was true or maybe it was not, but that is the story I have seen and been told. When Raytheon owned Beech, they hired a businessman named Linden Blue to be the President & CEO of Beech and he contacted Burt Rutan about being the lead designer of the plane. In true Burt Rutan fashion his concept included a canard wing. The design also featured a three-phase electrical system, carbon

composite structure, and a glass cockpit, and an automatic deicing system. I have to admit since I am of the dinosaur era of small computers I had always been amazed that Beech was able to have multicolored displays for the glass cockpit in the 1980s since I had never seen anything other than monochrome displays. A Beech engineer set me straight by explaining the displays were actually miniature color TVs with vacuum tube technology. By the way the FAA man admitted to me that they were not prepared for the technology in the Starship and went way overboard in requiring additional things from Beech to make the plane more structurally sound and more redundancy with the glass cockpit than was probably necessary.

For this part of the series on the Starship I have included a picture of an ad that Beech ran for the Starship. Does this plane look familiar to you? It should it is the very plane in our Museum as you see the plane Beech donated to us was the one they used in their promotional material and promotional flights. It also was one of the planes they used to test various technologies in. The photo of the ad was sent to me by a Textron Executive who has visited our museum and very much enjoyed his visit. Stay tuned for the September edition of Flypaper where I will have more information about the Starship.

When we set out to develop Starship, our goal was simply to create the most advanced, durable, reliable, roomy and capable turboprop available to the business traveler. We're happy to report that, on all counts, we succeeded.

However, like the end product, our way of getting there was anything but conventional.

Rather than relying on traditional solutions, we chose a bolder path. One that used technology unavailable in any other business aircraft. Such as graphite composite construction so strong it has no fuselage or wing life

limit like most other airplanes. Such as state-of-the-art avionics more advanced than any other in general aviation. Such as the unique wing configuration that simultaneously provides better stability and less drag.

The result is an airplane of such high quality levels that we feel confident enough to offer a 5-year warranty plus 2 full years of free maintenance.

Of course, we know one day in the future our competitors may have airplanes like Starship. But rather than wait that long for a copy, why

not avail yourself of the opportunity to own the original.

For more information on Starship and Beechcraft's unique 2-year free maintenance program, or for a demonstration flight, call 1-800-835-7767 Ext. 573 (in the U.S. and Canada).

Beechcraft. Where new ideas take flight.

KYMBERLY LOGAN KEEPS THEM FLYING

SAFETY WIRE— Size and pattern matters

Last month, I wrote about the importance of proper safety wire and told you turn buckles were something different and we would cover this month! Well here we go!

Turn buckles are difficult to safety, I won't lie! Most of the time they are in the most inconvenient places with little space around to get to them and you reach into the worst areas. Add to the difficulty, you have to use bigger wire which doesn't bend as easily.

The AC 43.13-1B starting on page 7-43, there is an entire section on safety of turn buckles! If it has its own section, it's pretty important! There are multiple ways to safety turn buckles and the FAA was nice enough to include pictures! Figure 7-26 shows us the four ways to safety. Each way has a purpose and a specific use.

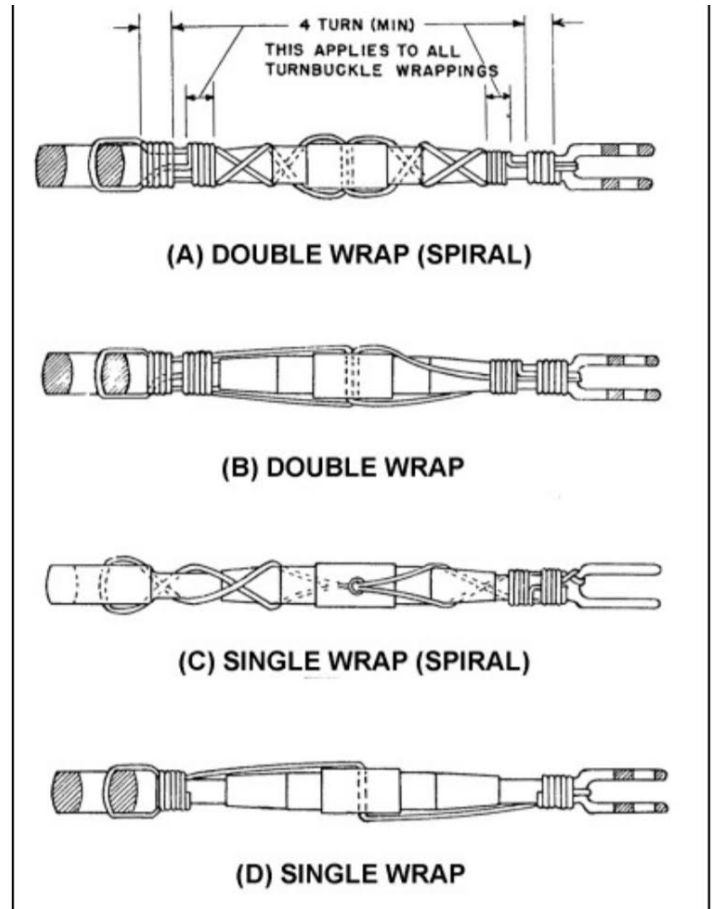

FIGURE 7-26. Safelying turnbuckles.

AC 43.13-1B

9/8/98

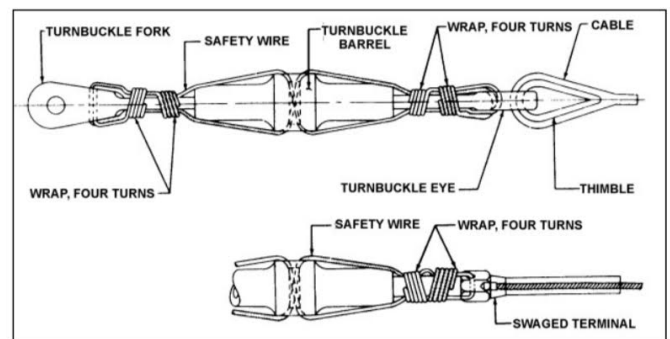

FIGURE 7-27. Securing turnbuckles.

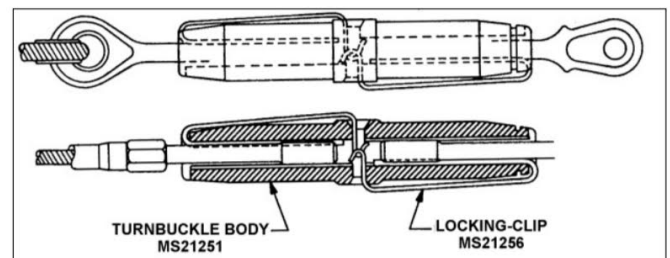

FIGURE 7-28. Clip-type locking device.

In each case, you **MUST** wrap the ends! Each end should be wrapped a minimum of four times, tightly! You must also use the correct size of safety wire! The FAA gave us the guidance in table 7-8 on what size of wire, which method is best, and the type of wire to use for our cables! How very helpful of the FAA!

TABLE 7-8. Turnbuckle safetying guide.

Cable Size	Type of Wrap	Diameter of Safety Wire	Material (Annealed Condition)
1/16	Single	0.040	Copper, brass. ¹
3/32	Single	0.040	Copper, brass. ¹
1/8	Single	0.040	Stainless steel, Monel and "K" Monel.
1/8	Double	0.040	Copper, brass. ¹
1/8	Single	0.057 min.	Copper, brass. ¹
5/32 and greater.	Double	0.040	Stainless steel, Monel and "K" Monel. ¹
5/32 and greater	Single	0.057 min.	Stainless steel, Monel or "K" Monel. ¹
5/32 and greater	Double	0.0512	Copper, brass.

¹ Galvanized or tinned steel, or soft iron wires are also acceptable.

Please note the diameter of wire column. Not once does it mention the typical .032 wire that you would use on your oil filter! The tensile strength is not adequate enough for turn buckles using .032.

If you absolutely hate safety wire and have the correct type of cable ends and barrel, you can use clips! To verify that you can use the clips, you will see in the cable end a small slit disrupting the threads down the side. This groove is for the clip to fit into. You will also see a small notch on the side of your barrel. Again, this is for the clip to fit into. These are wonderful when used properly! Again, the FAA helps us select the proper type and procedures. I will tell you, some cables were not manufactured to use clips, so you must visually

verify if you can use the clips, if you can not see the groove in the threaded end of your cable, you must use the safety wire! I will tell you, it is not always easy to line up the grooves for the clip, but once the grooves are perfectly aligned the clips slide in easily!

TABLE 7-9. Locking-clip application.

NOMINAL CABLE DIA.	THREAD UNF-3	LOCKING CLIP MS21256	TURNBUCKLE BODY MS21251
1/16	No. 6-40	-1	-2S
3/32	No. 10-32	-2	-3S
		-2	-3L
1/8	1/4-28	-1	-4S
		-2	-4L
5/32		-1	-5S
		-2	-5L
3/16	5/16-24	-1	-6S
			-6L
7/32	3/8-24	-2	-7L
1/4			-8L
9/32	7/16-20	-3	-9L
5/16	1/2-20		-10L

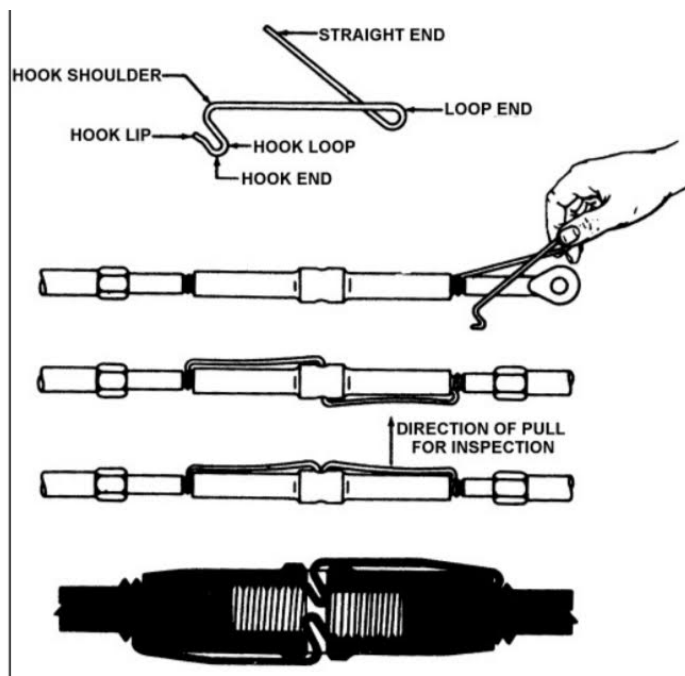

FIGURE 7-27. Assembling and securing clip-locking turnbuckles

Here we see someone did a great job of safety wire! But.... It's the wrong diameter of wire, this was .032 not the .040. So this should not pass an annual inspection. If you look closely, they could have used two clips. If you can see the tiny V notch in the barrel on the top and bottom, that is where the clips slide in.

As always, when you are using safety wire or the clips, triple check your cable tensions during the process of safety! The smallest turn of the barrel can and will change your cable tension. Then, you must redo the entire process again of rigging your cable tensions.

Cables, cable tensions, and the health of your cables and their components are extremely important! The loss of or incorrect cable tensions will affect your ability to fly the aircraft properly! Each manufacturer has specific requirements for cables. Always check at every annual the cable tensions are correct and there is no evidence of broken strands, distortions, or wear marks in your cables (proper cable health)! Also check their components, such as pulleys, pulley bearings, cable ends and barrels. If there is any evidence of wear and tear, it will need to be addressed immediately.

As always, if you have any questions, just ask your friendly mechanic! Remember, a mechanic can say it's in an airworthy condition, but the owner/pilot has the final say if it's airworthy.

Kymberly Logan
Logan Aviation — 620-260-0502

ANOTHER ISSUE

THANKS TO: Bill Cotter, Bill Long, Bob Immel/Mid America Air Museum, Dr. David Jones, EAA, Jerry Koehn, Kymberly Logan, Liz Vulgamore, Mark Davis, Randall Loder, Todd Crist, Tom Auerbach. **THANK YOU ALL FOR YOUR SUPPORT!**

WEBINARS

This is an abbreviated list of upcoming webinars. Check out the EAA website for a complete list.

<https://www.eaa.org/eaanews-and-publications/eaawebinars>

AND, you can watch the webinars after they are recorded, at any time you would like. This will not allow for WINGS credit, however.

8/9/23—7 p.m. CDT

Unbelievable Compressions

Qualifies for FAA WINGS and AMT credit.

Mike Busch

The FARs require a differential compression test to be performed at every annual inspection, but it's a really terrible test that is neither reliable (i.e., repeatable) nor a valid indication of cylinder health. In this webinar, Mike Busch, A&P/IA, demonstrates its shortcomings, explains its pitfalls, and emphasizes why poor compression alone should never justify cylinder removal unless backed up by more trustworthy supporting evidence such as a bore-scope inspection.

8/16/23—7 p.m. CDT

Vintage Aircraft Parts Substitution

Qualifies for FAA WINGS and AMT credit.

Tom Charpentier

The EAA government advocacy team gives a briefing on the various FAA policies used to keep vintage aircraft in the air, including the FAA's new Vintage Aircraft Replacement and Modification Article (VARMA) program.

8/23/23—7 p.m. CDT

Swift Fuels Unleaded Avgas

Qualifies for FAA WINGS and AMT credit.

Chris D'Acosta

Chris D'Acosta, Swift Fuels CEO, will discuss current and future Swift Fuels plans for the transition to an unleaded fuel for piston aircraft. Chris will share what's happening with their high-octane 100R unleaded avgas product and their premium UL94 unleaded avgas.

9/6/23—7 p.m. CDT

Legal Interpretations

Qualifies for FAA WINGS and AMT credit.

Mike Busch

We all love the FARs, right? Those regulations are written and maintained by a large team of FAA lawyers who work for the FAA Office of Chief Counsel. If you have a question about the meaning of a particular rule, you can request a "legal interpretation" and usually the responsible FAA attorney will draft one for you. More than 1,000 of these legal interpretations can be found online. Some are quite surprising and counterintuitive, and some significantly alter what most of us thought the regulations mean. In this webinar, Mike Busch, A&P/IA, reviews some of the most interesting, surprising, and significant ones that pertain to aircraft maintenance.

SUBLETTE, KS LAST MONTH

Photos courtesy Bill Cotter & Bill Long

BILL LONG happily reports there were lots of children at the Sublette fly-in, enjoying themselves!

UPCOMING EVENTS

TOM AUERBACH of Ponca City, OK does a GREAT job of keeping a list compiled of upcoming aviation events. Looking for an excuse to fly? Here you go! Remember to verify as part of your preflight! Covid issues as well as weather issues can cause last minute changes.

If you know an event has been cancelled, please contact Tom Auerbach @

Saturday, August 19, 2023

The 2nd Annual STOL Competition at Woodring will now be held on 19 August 23. We invite you to join us as a volunteer and be an integral part of making this event a resounding success. The success of the STOL competition relies heavily on the commitment and dedication of volunteers like you. As a volunteer, you will have a unique opportunity to contribute your time, skills, and enthusiasm toward creating a memorable experience for all attendees. We really need at the very least a minimum of four volunteers to make this year's STOL competition a success. Please feel free to contact me by email or phone with my contact information below. We currently have no volunteers to make this event happen. Please reach out to me as soon as you can. Thank you!
